

# NO WIRES

Supercharge your space with **muzo**

Almost every space requires the ability to power technology. For years and to this day we still depend on sockets on walls, floors, and extension cables. Unsightly plastic ports and trunks are integrated into beautiful wooden tops only to house several cables often tangled up with one another.

Wireless power is a cost effective, environmentally friendly advancement to future-proof any space so that it can be re-purposed without restrictions.

## Qpac

Packs 200Wh of charging time into a portable power pack that can be taken anywhere. To translate that into the run time, you'll get an additional 20 hours from your laptop, 50 hours from your tablet and 200 hours from your cell phone.

## Q-clip

A simple clip that is easily attached to the Kite or Versatilis table leg and allows Qpac to be easily slotted on.

## Juice Tree

Features a removable Qpac battery which negates the need for dangerous loose power cables. So, no more running extension cables across floors from the wall or scrambling on the floor connecting to floor boxes. This is a self contained, mobile, safe charging unit.

## Recharge Unit

A mobile unit that allows you to charge up to 12 Qpacs at once. Simply click the Qpacs into place, connect the station to a mains power outlet and the recharge process begins. It's especially handy at the end of the day to collect a bunch of Qpacs and leave them on an overnight charge.

Q-clip attaches to the table leg so that the Qpac can now be slotted on.

Existing Kite users can easily add Qpac to their existing set up.

Juice Tree is designed to be placed within 4 Kite tables and offers 4 visible power ports. It can also be used as a individual power source within a room.

## PORTABLE

Qpac packs 200Wh of charging time into a portable power pack that can be taken anywhere. To translate that into the run time, you'll get an additional 20 hours from your laptop, 50 hours from your tablet and 200 hours from your cell phone.

## PORTABLE

The Qpac features our partner OE's patented TUF USB CHARGER – 5v, 9V, 15V, & 20V Power Delivery from the USB-C port for super fast charging, and a 5V (3A) power from the USB-A port for charging legacy devices.

USB-C

USB-A

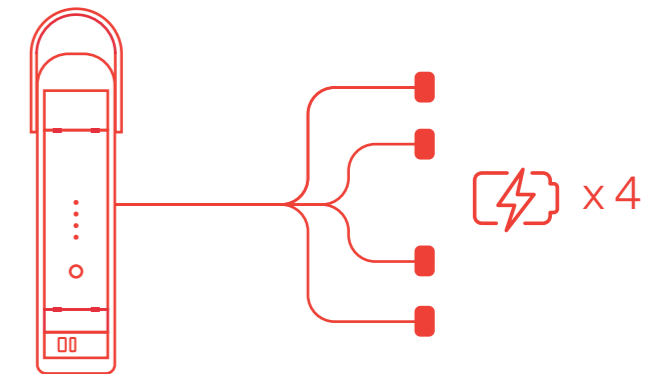

## SIMPLE

One press of Qpac's orange button reveals how much charge is available, indicated on the LED panel. These LEDs also communicate several other features, such as charging progress, charge completion and fault modes.

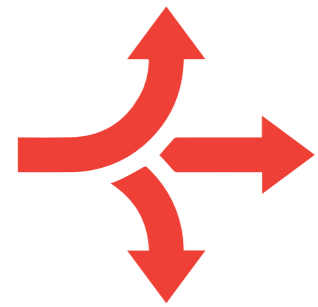

## SIMPLE

The Qpac can daisy chain link to power up to 4 further Twin/USB/USBC charging points.
